

## ***CURRICULUM VITAE***

### **Dr. FEDERICO G. LEGNANI**

**Neurochirurgo**

Data di nascita: 12/09/1974

Il dott. Legnani è un neurochirurgo formatosi professionalmente presso l'Università di Milano e la Johns Hopkins University di Baltimora negli USA.

Dal 2005 lavora presso l'Istituto Besta occupandosi di microchirurgia delle **neoplasie cerebrali, biopsia robotica delle lesioni inoperabili** e diagnosi e trattamento della patologia della colonna e del midollo spinale, sia tumorale che degenerativa.

**Dal 2017 è Direttore Medico dell'Unità clinica degli Studi di Fase I** e si occupa di una vasta gamma di studi clinici incentrati sulla ricerca di terapie innovative per molti tipi di tumore cerebrale.

Dal 2019 ha ricevuto l'incarico di “**eccellenza professionale**” nella **neuro-oncologia chirurgica dei tumori gliali**.

Dal 2019 ha ricevuto **l'abilitazione scientifica nazionale a professore di II fascia (professore associato)** in Neurochirurgia.

Il suo interesse clinico e di ricerca è rivolto alla patologia oncologica dell'encefalo e del rachide, con un particolare riferimento a:

- **Microchirurgia dei tumori gliali** (glioblastoma, astrocitoma anaplastico, astrocitoma di basso grado) lesioni in area eloquente (area motoria e linguaggio), pianificazione pre-opeartoria con RM Funzionale, RM intraoperatoria, Trattografia, intervento in microchirurgia assistita da immagini (neuronavigazione, ecografia intraoperatoria, fluorescenza 5ALA).

- **Biopsia chirurgica robotica** delle lesioni cerebrali inoperabili.

- **Microchirurgia dei tumori intrinseci del cervelletto** (ependimoma, medulloblastoma, astrocitoma pilocitico).

- **Microchirurgia dei meningiomi dei neurinomi e delle metastasi.**

- **Microchirurgia dei tumori del midollo spinale** (ependimoma, meningioma, Schwannoma, astrocitoma) e **delle patologie degenerative del rachide lombare e cervicale** (ernia discale, stenosi del canale spinale).

### **CONTATTI**

Segreteria di Neurochirurgia 02/23942411-2412

### **ATTUALE POSIZIONE LAVORATIVA**

Dirigente medico neurochirurgo,  
Direttore medico dell'Unità clinica degli Studi di  
Fase 1  
Unità operativa Neurochirurgia I (neuro-oncologia)  
e IV divisione (chirurgia spinale), Dipartimento di  
Neurochirurgia

Abilitazione scientifica nazionale a Professore di II fascia settore 06/E3 - Neurochirurgia e Chirurgia Maxillo Facciale (profilo: settore scientifico disciplinare MED/27 – Neurochirurgia, 19/09/2019-19/09/2025)  
Fondazione IRCCS Istituto Neurologico “C. Besta”  
Via Celoria, 11, 20133 Milan, Italy  
Segreteria Tel +39-0223942411/2  
Fax +39-0270635017  
[federico.legnani@istituto-bestait](mailto:federico.legnani@istituto-bestait)

### **TITOLI DI STUDIO**

- 15 Settembre 1988- 17 Luglio 1993 Diploma di maturità presso il Liceo Classico “G. Berchet” di Milano
- 1 Novembre 1993- 19 Ottobre 1999 Laurea in Medicina e Chirurgia presso l’Università degli Studi di Milano. Tesi. “Angomi cavernosi ed epilessia: valutazione pre-chirurgica con metodiche non invasive e risultati clinici a distanza.” (110/110)
- 1 Novembre 1999- 11 Novembre 2005 Specialità in Neurochirurgia presso l’Università degli Studi di Milano. (70/70)

### **FELLOWSHIP**

- 4 Ottobre 2002- 15 Novembre 2004 Post-Doctoral Research Fellow, presso la divisione di Neurochirurgia Oncologica e Cerebrovascolare della Johns Hopkins University, School of Medicine, Baltimore, MD, USA

### **CLINICAL TRIAL TRAINING**

- Certificato di GOOD CLINICAL PRACTICES (GCP), Expiration Date: 26 Gennaio 2023.
- Certificato di Advance Life Support (ALS)
- Certificato di BLS-D RETRAINING

### **AWARDS, HONORS**

- 1999 Vincitore dell’*Erasmus-Socrates exchange program* presso la Virchow Klinik della Humboldt University, Berlino, Germania
- 2004 Vincitore dell’*Harvey Cushing Hunterian Award* presso il dipartimento di Neurochirurgia di Johns Hopkins University, School of Medicine, Baltimore,

	MD, USA, attribuito al Fellow con i migliori risultati di ricerca in neurochirurgia
2004	Vincitore dell' <b><i>Agustus McCravey Award</i></b> presso la Southern Neurosurgical Society per lo studio dal titolo: "Lysis of intraparenchymal hematoma with stereotactically implanted tPA polymers in a rabbit model"
2004	Vincitore del <b><i>Galbraith Award</i></b> presso la AANS/CNS Cerebrovascular Section per lo studio dal titolo: "Simvastatin attenuates experimental cerebral vasospasm and ameliorates serum markers of neuronal and endothelial injury in patients after subarachnoid hemorrhage: A dose-response effect dependent on endothelial nitric oxide synthase"
2004 – 2007	Grant Finanziato NIH RFA R21-R33 (2004) dal titolo: "Enhancement of Brain Tumor Immunotherapy by Fas-L RNAi" (Principal Investigator: Prof. Alessandro Olivi). Ruolo nel progetto: grant writer e fellow.
2008-2011	Grant Finanziato Ministero della Salute Ricerca Oncologica, progetto ordinario dal titolo: "Role of Brain Mapping in the surgical treatment of low grade gliomas". (Principal Investigator: Prof. G. Broggi; Scientific Coordinators: Dr. F. DiMeco, Prof. SM Gaini). Ruolo nel progetto: grant writer e fellow.
2014-presente	Responsabile scientifico presso la Fondazione IRCCS Istituto Neurologico C. Besta dello studio dal titolo : "Very fast Imaging by Broadband coherent Raman (VIBRA)". Studio diretto dal Prof. D. Polli (Dipartimento di Fisica, Politecnico di Milano) ERC Consolidator Grant (2014).
2016-presente	Principal Investigator nel Progetto dal titolo: "Application of the iSYS1® Miniature Guidance Device for Stereotactic Neurosurgical Interventions: A Prospective, Exploratory Pilot Study". Studio prospettico, a singolo braccio, monocentrico, interventistico non farmacologico di neurochirurgia robotica in collaborazione con l'Austrian Center for Medical Innovation and Technology (ACMIT GmbH) supportato da Medtronic USA.

## **CAMPI DI INTERESSE CLINICO**

Principalmente interessato alla chirurgia dei tumori cerebrali della volta e della base cranica e della colonna vertebrale (degenerativa e tumorale). Nello specifico:

- Approccio multimodale ai gliomi di alto grado nelle aree del linguaggio al fine di ottenere la massima resezione tumorale nel rispetto delle funzioni cerebrali. Interventi in awake surgery (chirurgia a paziente sveglio). Interventi in anestesia generale con valutazioni neuropsicologiche e neurofisiologiche pre e post-operatorie combinate con tecniche avanzate di neuroimaging come fMRI, DTI e TMS neuronavigato, integrate intraoperatoriamente con elettrodi endotracheali ed elettrostimolazione corticale (ECS)
- Tailored craniotomy per tumori cerebrali intrinseci delle aree e delle vie motorie con mappatura cerebrale eseguita stimolando il tumore e la corteccia circostante alla ricerca di risposte negative e positive.
- Implementazione intraoperatoria di ultrasuoni (US) con l'uso di contrasto (CEUS), elastografia e sistemi di navigazione ultrasound.
- Sviluppo in collaborazione con Medtronic e Micro Guides Systems di un nuovo dispositivo robotico per eseguire biopsie stereotassiche frameless in pazienti affetti da tumore cerebrale non passibile di resezione chirurgica.

## **ESPERIENZA CHIRURGICA**

Più di 1300 casi come primo chirurgo: 80% chirurgia cranica elettiva, principalmente tumori cerebrali (intra-assiali ed extra-assiali, sopra e infratentoriali), 20% colonna vertebrale (tumori intra ed extra midollari e degenerativa della colonna vertebrale).

Più di 3000 interventi come secondo chirurgo (60% chirurgia cranica elettiva principalmente tumori cerebrali, 30% colonna vertebrale degenerativa, 10% tumori spinali).

## **ESPERIENZA DI RICERCA**

2001- 2002

Collaborazione con il laboratorio di Neuroimmuno-oncologia presso la Fondazione IRCCS Istituto Neurologico “C. Besta”, Milano

2002- 2004

Post-Doctoral Research Fellow, presso la divisione di Neurochirurgia Oncologica e Cerebrovascolare della Johns Hopkins University, School of Medicine, Baltimore, MD, USA

2013 - presente

Collaborazione con il Prof. A. Vescovi (Università Milano-Bicocca), nella creazione di cellule staminali di tumore cerebrale (Tumor Founding Stem Cells). Titolo del progetto: “Arricchimento

delle cellule staminali del cancro del glioma umano (GSC). Nuovi regolatori specifici per GSC. Terapia combinatoria con efrine e BMP4 ”.

2013 - presente

Collaborazione con il Prof. F. Retta (Università di Torino) nell'identificazione dei fattori di rischio genetico degli emangiomi cavernosi. Titolo del progetto: “Identificazione dei fattori di rischio di valore diagnostico e prognostico associati alla progressione clinica e alla gravità della malattia da CCM”.

2014- presente

Collaborazione con il Prof. D. Polli nel progetto: “Very fast Imaging by Broadband coherent Raman (VIBRA)”.

### **PRINCIPALI INTERESSI DI RICERCA PRECLINICA**

Le aree di ricerca includono: 1) identificare e testare nuovi agenti antitumorali, inclusi fattori anti-angiogenici rilasciati localmente da polimeri biodegradabili a rilascio controllato 2) uso combinato di diverse classi di farmaci antitumorali 3) uso di cellule staminali geneticamente modificate per fornire localmente agenti antitumorali per il trattamento di tumori cerebrali sperimentali in modelli animali 4) Cellule staminali tumorali cerebrali (cellule staminali che fondano il tumore): identificazione delle caratteristiche chiave relative alla biologia del tumore cerebrale che possono essere affrontate e risolte attraverso le cellule staminali tumorali 5) somministrazione locale di farmaci antinfiammatori per trattare il vasospasmo cerebrale dopo emorragia subaracnoidea in modelli animali (ratto, coniglio, scimmia) 6) potenziamento dell'immunoterapia mediante down-regulation dell'apoptosi dei linfociti T peritumorali nel pathway Fas-FasL 6) sviluppo di un microscopio innovativo per l'imaging non invasivo in tempo reale di cellule e tessuti utilizzando la spettroscopia coerente Raman.
